

Curt's Goals for the School Board

- Academic excellence and inclusiveness: Craft a strategic plan with measurable, achievable benchmarks that ensure intellectually rigorous opportunities appropriate for every student.
- Get the most out of our resources: Fiscal responsibility is not just about spending less, it is about getting more. We must promote innovation, identify best practices already in place, and spread both throughout the district.
- Include the Community: All of the board's critical decisions concerning strategic planning and response to growth must reflect the views of the community.
